

# Perfect Air Quality with KNX

## KNX Multi-Sensor for Air Quality SK25-LMS

### Measured Values

CO<sub>2</sub>

VOC

Particles

Temperature

Humidity

### KNX Air Quality Monitoring

All relevant air quality parameters in one device – fully integrated into KNX for healthy and energy-efficient buildings.

### Main Features

- Integrated particulate matter (PM) measurement
- Ideal for schools, offices, and residential buildings
- Enables demand-controlled ventilation (e.g. LUNOS ventilation system with Arcus-EDS KNX-LUNOS-Control4)

Find your KNX solution. We are happy to help.
